Herzlich geliebtester Schwager und Freund!

Wegen vielerley Hinderniß und Occupation habe jetzo erst Ew. werthes vom 7ten dieses beantworten können und bitte mich deßwegen halb zu excusiren.

~~[illegible]~~ Lessii [illegible] anatomie ist hier nicht zu haben, weder nach der holländischen noch Braunschw. Edition, und will keiner von unsern Buchhändlern ~~auf~~ diese Costen auflegen noch zu setzen haben.

Der selige Dippelius hat Hr. v. Dorsheim [illegible] brieff ~~an~~ [illegible] noch in Marburg von diesem nicht erhalten und überall vorgezeiget, selbigen aber kurtz vor s. Tod wieder an mich und Hr. v. Dorsheim [illegible] zugestellt, und es ist zu gutem Glück, weil dieser das Concept war, [illegible] copirt worden. Wenn diese ~~[illegible]~~ Avanture ist Hr. v. Carlen bekant wird, der vielleicht gedacht haben mag, Hr. v. Dorsh. habe ihn an Ihrem Ort auch [illegible] worden communicirt und möchte etwa durch Hr. v. Mallet eine Abschrifft zu bekommen suchen. Es liegt dieser brieff noch zum druck parat.

X 1. ~~[illegible] von mir verlangte [illegible] zu Medicin~~ [illegible] der Hauptlectionen der Medici wünsche von Gott Weisheit und Verstand. Die Anleitung die Sie von mir hierzu verlangen mögte ein anderer ~~[illegible]~~ der mehrere Erfahrung als ich hätte besser geben können; doch will ich mein geringes Vermögen ~~[illegible]~~ [illegible] aufrichtig dienen, wo mir bewust ist.

X 2. Es ist genugsam bekant, daß [illegible] Wissenschafften ist und [illegible] Affection in systemate medico also theologico, juridico und philosophico, wie auch in andern Künsten und Wissenschafften zu sehen, indem alle Regulae universaliores vielleicht ab [illegible] in particularibus [illegible] worden, deren Mannigfaltigkeit aber und ~~[illegible]~~ so viele exceptiones formiret, daß die Regulen selbst wiederum [illegible] worden. Es ist demnach eine ~~[illegible]~~ genaue Observation der Natur-Eigenschafften des objecti der Medicin, nemlich des Menschen nöthig, wie auch der Relation derselben gegen die Dinge die um ihn sind, aus denen er bestehet sein Erhaltung ~~[illegible]~~ hat und durch deren guten Gebrauch er in Gesundheit ~~[illegible]~~ bleibt oder aber durch den Mißbrauch schwach und hinfällig ~~[illegible]~~ wird, und endlich wie ihm, wenn er durch [illegible] Neigung und Unwissenheit verderbet ist, wieder zu helfen stehe. [illegible] der allein und derjenige der Gottes Geist in [illegible] hernach selbst und durch [illegible] zum Lehrer hat, und [illegible] Geist [illegible] als dem Leibe nach gegen die vorzüglichen Güter dieser Welt nöthig verhalt [illegible], [illegible]

Dürch seine albernen künstlichen Syllogismos der Vernunfft oder in den objectis dieser Welt gestattet ist, ohne von Gott ein Geist hiezu gemacht zu haben, dessen Zweck einiges Erkänntnis oder gar sich schon jetzo ~~[illegible]~~ auch blinden Liebe zu seinen Hirngespinsten einen ~~[illegible]~~ [illegible] hat der Medicum in den Gedanken vorstellt, seine [illegible] praxis ~~aber~~ ~~[illegible]~~ als ~~[illegible]~~ die erste Kunststein aller Conceptus ~~[illegible]~~ einfältig legitimiert; dergleichen ~~[illegible]~~ unselige Cerebrum Valentini in medicina infallibili und ~~[illegible]~~ Gautkey in Diss. de Medicina ad certitudinem mathematicam evehenda [illegible] habe, welcher letztere denn auch daneben ~~[illegible]~~ ~~[illegible]~~ vom Mangeto in Bibliotheca Scriptorum Medicorum auf Verdienst und Würdigkeit gepriesen wird. Er [illegible] und also die wahre Wissenschaft dieser Sache eine Nothwendigkeit auch die Erudition zu vermehren, weil wohl kein einziger Autor ist, der nicht vera falsis bona malis vermischt ~~[illegible]~~, und entweder seine observationes unrichtig gemacht oder seine daneben entdeckte Gedanken mehr oder ~~weniger~~ minder corrumpiert oder aber wenigstens Ursache dazu gegeben hat, wie uns solches alles die Erfahrung lehret [illegible] ~~[illegible]~~ die Historie der Medicin nachschlagen. Diese Erudition und Studium observandi muss ohne Praeoccupation von einer vorher gefassten Hypothesi geschehen und mithin die Natur aus der Natur selbst und nicht ~~[illegible]~~ [illegible] [illegible] Doctorum oder deren Wünschen erkläret werden [illegible] ~~[illegible]~~ sentiendi libertatem ~~[illegible]~~ ad modum Naturae [illegible] occupat [illegible] vertatur und solche gestellt werden experientia rationem ~~[illegible]~~ et artem medendi ~~[illegible]~~ ~~[illegible]~~ ex bona cognitione naturae humanae überhaupt und jedes individui insbesondere, wie auch dem Remediorum. [illegible] attente sui ipsius cognitio quoad scitu animae et corporis, ~~Chymia et~~ ~~[illegible]~~ Es der Vorschrift ist auch der Mensch [illegible] Cours, und dann, ratione remediorum, Chymia und Physik ~~[illegible]~~ ~~[illegible]~~ usus, endlich aber, um zu wissen was [illegible] bis hieher in Medicina geschieht, Historia Medicinae.

In Historia Medicinae literaria ist ~~[illegible]~~ Conringii Introductio in universam Medicinam ~~[illegible]~~ mit Schelhameri notis gut [illegible] einer Edition welche ~~Hoffmanni~~ [illegible] praefation die [illegible] ganz medicinam [illegible] Autorum [illegible] [illegible] Stollii zu Jena Historia medicinae [illegible]. ~~[illegible]~~ Clerici und Freindii Historia gut, nicht erstere aber bey ihm [illegible] [illegible]. In Historia pragmatica ist Camerarii Sylloge Cautelarum [illegible] medicinae dienlich, sondern aber die grosse Opera Mangeti et Bonneti und andere Corpora observationum.

Überhaupt [illegible] [illegible] der Medicinae durch opera Hippocratis besonders [illegible] [illegible], von andern Sydenhami, Paracelsi, Helmontiorum opera, und ~~[illegible]~~ von den neuern Stahlii und ~~Hoffmanni~~ Schrifften, worin aus ~~[illegible]~~ die ~~[illegible]~~ dessen Autoritaet ~~[illegible]~~ [illegible], die veras observationes practicas aber [illegible] [illegible] ~~[illegible]~~ auch D. Dippelii Schrifften und sonderlich dessen [illegible] [illegible] Licht und Recht und Vitae animalis morbus et medicina sind sehr dienlich. Herrn D. [illegible] Schrifften, so zu Leipzig gedruckt, ebenfalls, wie Herrn [illegible] und Liebe habe auch R. D. Carls [illegible] und obscure Scripta [illegible] [illegible]

das beste Vorrecht, wird es auch nicht übel gethan seyn.

X 5 In Physiologicis sind der Autores [illegible] so viel, daß einer sich selbst zuwider [illegible] kan man nicht viel sagen. Sondern als [illegible] Dippelii Vitae animalis morb. et medicina, F. M. Helmontij in Observationibus circa hominem ejusque morbos, unter denen Modernen Nenteri physiologische Theorie hominis sani. In anatomicis Casserii Tabellen, Bartholini Anatomie, wie auch Heisteri und Kulmi.

X 6 In der Pathologie wären oben itzo genannte Schrifften beyder Helmontiorum, Dippelii, Nenteri Theoria hominis aegroti wohl zu gebrauchen. ~~Pathologie~~ Anleitung zur Semiologie gibt Lommius in seinen Observationibus, denn man Nenteri Semioticam [illegible] und Junckeri Tabulas medico-practicas zu [illegible], als welche Pathologiam semioticam und Therapiam [illegible] ~~[illegible]~~ [illegible].

In Therapia generali et speciali sind ~~Hoff~~ Helmontii und Stahlii ~~[illegible]~~ Junckeri Schrifften wohl zu lesen. In Dippelii Vit. animal. morb. et medicina ist sich auch [illegible] Anleitung zu finden ~~[illegible]~~.

In specie ist in materia medica ~~Junckeri~~ Hermanni Cynosura materiae medicae et continuat. Boecleri wohl [illegible] etc. Junckeri Conspectus therapiae generalis, Hofmanni Medicina systematica worin da viel [illegible] handelt etc. dessen Schediasma de viribus plantarum [illegible] [illegible] Toxicologia.

In Pharmacia et Chymia ~~[illegible]~~ vulgari ~~[illegible]~~ [illegible] Schroederi Armamentarium, Lemery cursus chymicus, ~~[illegible]~~ de Spina [illegible], Junckeri Lexicon chymico-pharmaceuticum, ~~Stahlii~~ ~~[illegible]~~ [illegible] Stahlii Chymische Schrifften, Hofmanni observationes physico-chymicae. In specie in chymia [illegible] Paracelsi, Helmontiorum, Nenteri, Trevisani, Basilii Valentini, + [illegible] Sendivogii, ~~[illegible]~~ [illegible] Cohausen scripta + wohl zu [illegible].

In Chirurgia möchten Paracelsi Wund-Artzney, Heisters und Junckeri Chirurgia.

X 7 In Diaeteticis sind Behrens selecta Diaetetica und Elsholtii Diaeteticon wohl [illegible], [illegible] woraus [illegible] zum Anfang und [illegible] ~~[illegible]~~ der Medicin [illegible] gedient.

Im übrige wird der [illegible] unter der Hand selbst gehen, [illegible] besser als ich [illegible] kan.

Gott gebe zu allen seinen Segen und Crafft und [illegible] Grüße alle von Hertzen [illegible] Ehre und [illegible] ~~[illegible]~~, ~~[illegible]~~ [illegible] wie [illegible] wol wir wollen [illegible] bin

X 1 Ratione des zu amplectirenden studii Medici wünsche von Gott Weisheit und Verstand. Die Anleitung, die von mir hierzu verlangen, wünsche mir andere, die mehr Erfahrung als ich hat, besser geben können, doch will nach meinem geringen Vermögen mit dem gern aufwarten können, was mir bewusst ist

X 2 Es ist genugsam bekannt, dass alle unsere Weisheit Stückwerk ist und so wenig perfectio in Systemate medico als in theologico juridico und philosophico und auch andern Künsten und Wissenschaften zu suchen, indem alle Regulae universaliores erstlich ex experientia in particularibus meistens hergenommen worden, deren Mannigfaltigkeit aber und oft so viele Exceptiones formirt, dass die Regulae selbst wieder darüber gemischet werden. Es ist demnach eine genaue Observation der Natureigenschaften des Objecti der Medicin, nämlich des Menschen nötig, wie auch die Relation desselben gegen die Dinge, die um ihn sind, aus denen er bestehet, Erhaltung hat und durch deren guten Gebrauch er bei Gesundheit bleibt oder aber durch deren Missbrauch schwach und hinfällig wird, und endlich was ihm, wenn er durch böse Neigung und Unwissenheit verdorben ist, wieder zu Hilfe stehe. Da denn allein wird derjenige, der Gottes Geist in dieser Untersuchung [illegible] selbst und desgleichen vorzu~~[illegible]~~ ihm seine Kräfte hat, wirklich dem Geiste gemäss als dem Lichte nachgehen, die vorzüglichen Geistesgaben [illegible] verhält, besser fortkommen, als der sich nur [illegible], durch sein albernes künstliches Systematisieren der ~~Vernunft~~ Vernunft, die in denen Objectis dieser Welt geschäftig ist, ohne von Gott und Geist [illegible] gemacht zu werden, diesen Zweck erreichen zu können oder gar sich ihrer selbst aus blinder Liebe zu seinen Hirngespinsten eine Vollkommenheit der Wahrheiten in den Gedanken vorstellt, so sich aber in praxi als der rechte Prüfstein aller Konzepten nicht legitimiert, dergleichen unselige Arbeit Valentini in medicina infallibili und Hanckes in diss. de medicina ad certitudinem mathematicam evehenda unternommen haben, welcher letzter dann auch darüber von Mangeto in bibliotheca scriptorum medicorum nach Verdienst und Würdigkeit restringiert wird. Es leget uns also die wahre Bewandnis dieser Sache die Notwendigkeit auf, die Eklogen zu erwählen, weil wohl kein einziger Autor ist, der nicht Wahres mit Falschem, Gutes mit Bösen misciert und entweder seine Observation nicht richtig gemacht oder seine darüber entdeckten Gedanken mehr oder minder revociert oder aber wenigstens Ursache dazu gehabt hat, wie uns alles solches die Erfahrung lehrt, wenn wir die Historie der Medizin nachschlagen. Diese Ecloge und Studium observandi muss ohne Praeocupation von einer vorher gefassten Hypothesi geschehen und mithin die Natur aus der Natur selbst und nicht ex mente doctorum oder deren Büchern erklärt werden. Per absolutam agendi et sentiendi libertatem ad modum naturae. Und solcher Gestalt macht experentia rationem et artem medendi ex bona cognitione naturae humanae überhaupt und jedes individui insbesondere wie auch deren remediorum. Hierzu hilft attenta sui ipsius cognitio quoad spiritum animam et corpus. So der Schlüssel auch ist, andere Menschen auch kennen zu lernen und dann, ratione remediorum, chymia und justus rerum usus, endlich aber um zu wissen was von Anfang bis hierher in medicina passiert, historia medicinae.

X 3 In historia medicinae litteraria ist Conringii introductio in universam medicinam mit Scheelhammers notis gut, sonderlich die neue edition wobei Hoffmanns we prefatio, die in allen Teilen der Medizin guten Autoren erwähnt, auch des Stolle zu Jena historia med. ist nicht zu verwerfen. Weiter sind Leclere Clarici und Freindii historia gut mit ersterem kann man zu Anfang genug haben. In historia pragmatica ist Kamerarii Systema Stahl praecognita medicinae dienlich (dienlich) sodann aber die grossen opera Mangati und Bonati und andere corpora observationum.

X 4 Überhaupt sind zum Erlernen der Medizin dienlich opera Hippokrates der sonderlich unter den Alten vor anderen zu estimieren. Paracelsi, Hellmontiorum opera und von den Neueren Stahlii und Hoffmanni Schriften worinnen man mehrenteils die raisonements denen Herren Autoribus                , die veras observationes practicas aber sich zu seinem Nutzen anmerken muss. Dippels Schriften und sonderlich dessen Wegweiser zum verlorenen Licht und Recht und vitae animales morbus et medicina sind sehr dienlich, Herrn Doctor Reichen's Schriften ebenfalls und wenn Sie Lust und Liebe haben auch Herrn Doctor Carls hochtrabende und obscura scripta zu evolvieren um daraus das Beste zu erwählen wird es auch nicht übel getan sein.

X 5 In Physiologicis sind der Autores morales so, die

Kunst sich selber und andere zu erkennen, lehren, nützlich zu lesen. Sodann oben angezogener Dippel vitae animales morbus et medic. et F.M. Helmontius in observationibus circa hominem ejusque morbos, unter den Stahlianern Kenderi physiologia in anatomicis Casserius Tabellen Bartholini anatomia wie auch Heisteri, Kulmi

X 6 In der Pathologie wären eben itzo genannte Schriften des Helmontii und Dippelii, neben Theoria [illegible] aegroti wohl zu gebrauchen. Eine Anleitung zur Semiologie gibt [illegible] [illegible] observationibus, denen man Kenderi semioticam [illegible] und Junckeri Tabulas medico practicas beifügen kann, als welche Pathologiam Semioticam und Therapiam beisammen enthalten. In Therapia generali und speciali sind [illegible] Hoffmanni Halensis, Stahlii und Junckeri Schriften wohl zu lesen; des Dippelii vita animalis et medicina [illegible] gibt auch einige Anleitung zu ~~[illegible]~~

In specie ist in materia medica Schröderi armamentarium. [illegible] materia medica cum Commentario Baeleri wohl zu lesen. Junckeri Therapia generalis, Hoffmanni medicina systematica, wo sie de viribus medicamentorum handelt, [illegible] Schellasius de viribus plantarum [illegible] Theodori Tabernaemontani Kräuterbuch, [illegible] Balneotherapia. In Pharmacia et Chymia vulgari dienen Schroederi armamentarium pharmaceuticum, Lemery cursus chymicus, [illegible] Lexicon pharmaceuticum, [illegible] Lexicon chymicum. [illegible] Stahlii specielle Schriften, Hoffmanni observationes physico-chymicas. In [illegible] chymica sind Paracelsi, Helmontii, Basilii Valentini, Kunckeli [illegible] Schriften wohl zu gebrauchen. In Chirurgia möchten dienen Paracelsi Wundarzney, Heisteri und Junckeri Chirurgie.

X 7 In Diätetica sind Bohnii [illegible] Diätetica und [illegible] [illegible] wohl nützlich.

Und dies wäre denn dasjenige, so wie ich es befinde, welches [illegible] zum Anfang in der Medicin [illegible] [illegible] gedient. Das übrige wird der Usus [illegible] [illegible] selbst geben [illegible] [illegible] [illegible] [illegible] [illegible]

Gott gebe zu allem seinen Segen und lasse mich unter dem Praesidio seines Geistes Alles zu [illegible] Namens Ehre und so viel werden als [illegible] [illegible] Zeiten, so wird es den guten succes nicht fehlen
